

OVERVIEW

EHR Interoperability Experts

Clinicians need access to the right data at the right time to provide optimal patient care while achieving operational goals and efficiencies.

Founded in 1999, eMedApps serves over 5,500 healthcare providers across the U.S. The company offers a suite of integration, business continuity, and professional services solutions that facilitate EHR transitions and deliver interoperability within and across healthcare enterprises and information systems. With over 15 years of experience integrating EHRs, eMedApps' expert consultants know what works and what doesn't, providing valuable insight to clients.

eMedApps combines vendor-neutral, patient-centric workflow, and comprehensive healthcare technology consulting experience to help healthcare delivery organizations meet business, regulatory, and patient care goals.

Headquartered in Schaumburg, IL the company has offices in San Diego, Houston, and Boston.

Markets

Analysts forecast the EMR/EHR market in the U.S. to grow at a CAGR of 6.53% over the period 2014-2019¹. As the focus shifts from adoption to optimization for the U.S. Electronic Health Records Market, transformational shifts brought on by regulatory requirements, reimbursement penalties, and technological advances strain provider IT resources. The creation, storage, and exchange of patient care data will bring focus to health IT system interoperability solutions in 2016.

Executive Team

Joseph Cernik

Vice President of Business Development

Vikram Sheshadri

Vice President of Product Development

Imran Siddiqui

Vice President of Client Implementation Services

Sarvesh Dewan

Vice President of Network Infrastructure

Ajay Patel

Chief Solution Architect

Working across a diverse ecosystem of health IT offerings installed at hundreds of client sites, eMedApps brings expert resources, skill sets and a collaborative culture to hospitals, HIEs, Clinics, Federally Qualified Health Centers (FQHCs) and Community Health Centers.

Products and Services

The company provides healthcare IT software and services including business continuity, data exchange, integration, migration, and data conversions for EHR and Practice Management solutions, along with hosting and HIT infrastructure management services.

Software - Universal Patient Data Connectivity and Exchange

CareBridge™ integrates the EHR with all other health IT systems to create a truly interconnected network of patient data that is easily shared, managed, and accessed across healthcare enterprises and information systems.

CareFinity™ is a business continuity solution that provides seamless access to all patient chart information, schedules, and archived EHR systems allowing clinicians to document visits even when the EHR is unavailable due to planned or unplanned application and network outages.

Comprehensive Healthcare IT Professional Services

As certified NextGen consultants, eMedApps specializes in optimizing the NextGen EHR to maintain peak efficiency, facilitate seamless upgrades, and deliver advanced technology to enhance the system's capabilities. Consultants have access to advanced releases, training, and client referrals. No EHR vendor can provide applications for every possibility. eMedApps builds and provides products that fill gaps

in the vendor's software making each client's NextGen Ambulatory EHR operate smarter, faster, and easier.

The eMedApps Care Connectivity Platform is comprised of ONC-certified interface technology, robust business continuity solutions, and other mission-critical health IT and workflow solutions such as data conversions and migrations, secure application hosting, and mobile EHR access.

Hosting - Insource, Outsource, and Hybrid Models

eMedApps provides insource, outsource, and hybrid hosting for EHR, Practice Management, and Revenue Cycle Management solutions. Clients utilize secure, HIPAA-compliant data centers or take advantage of eMedApps-managed hosting services. Regardless of the configuration chosen, eMedApps experts alleviate the IT burdens from provider teams, freeing them to focus on delivery of exceptional patient care.
