Live Archive and EHR Downtime for NextGen

- Moves data out of the EHR and PM based on configuration
  - Clinical
  - Billing
  - Significant Events
- User is able to view data embedded in the EHR
- If needed patient can be restored to the EHR and data would be available in the EHR and PM
- Provides local copy of clinical, schedule and financial information
- Accessible whether EHR is available or not, planned or unplanned outage
- Accessible via mobile devices if desired by clinic
- Allows creation of Visit Note that can be saved in CareFinity or moved back into EHR when system is available
