

CareFinity[®] EHR Archive Solution

Archive Patient and Financial Data for Easy Access

Whether you are migrating to a new EHR, merging with another group, sunsetting your EHR, or just want to have long term access to your data without the full cost of EHR support and maintenance, CareFinity[®] Archive is the solution.

CareFinity[®] EHR Archive provides all the functions necessary to work with archived charts and meet regulatory needs including printing and exporting for Release of Information, user access tracking, and patient search capabilities.

Integrate with your existing EHR systems so that clinical staff can access archived chart information directly from the patient chart in their EHR.

- Archive and view data from legacy systems
- Cost friendly alternative to data conversions
- Access archived clinical and billing information
- View archived data on your desktop, laptop, or remotely on your mobile device
- Archive data from multiple EHR systems
- View all documents and images
- Print and export records for Release of Information (ROI)
- Access data from multiple locations
- Audit logs of user access
- Multi-factor Authentication
- Supports SSO and can be embedded into your current EHR
