eMedApps™

BBP Billing Automation Analysis for NextGen Practice Management

Optimize your BBP with this special offer!

eMedApps' now offers assistance with the setup and optimization of the Background Business Processor (BBP) for your Nextgen Practice Management system. This special offer includes a thorough analysis of your CBO/Billing staff's daily manual tasks and your current use of BBP. The customized report will provide recommendations for the automation of daily tasks and optimization of your BBP.

There are multiple uses of the NextGen BBP that can improve your daily activities. You can set payment batches to post on the BBP, process pending charges, print paper claims (1500, UB, and ADA), and print encounter, recall, and budget letters. You can import ERA files, automate insurance eligibility and 227 and 997 EDI imports, create claims, and generate EDI files. You can also utilize BBP for your month-end report package, creating patient statements, and much more. If you are not using the BBP for these tasks, let eMedApps show you how.

What does the BBP Billing Automation Analysis include?

4-hour Analysis of Current BBP Setup and Usage
- Review each billing job and its setup
- Meet with billing staff that performs daily tasks to review how they are being completed
- Identify billing tasks that can be automated or optimized using BBP
- Assess BBP job schedule and provide recommendations to reduce BBP job failure
- Provide a final report of our recommendations for total BBP optimization
